

Please note that Bandstra Transportation has relationships with carriers around North American and the world to provide a service area too large to list. The following table is of the communities that we directly service and/or commonly interline freight to. We are able to service interline locations and beyond through our Truckload and Specialized Logistics divisions. If you have any questions about our service locations please contact us today.

Table Reference:

- **"Direct"** indicates that we services this location direct and the freight will be delivered from one of our trucks;
- **"Inter"** indicates that we work with an interline carrier to pickup the initial freight or to complete final delivery; and
- **"Hold"** indicates that hold the freight at our terminal for the customer to come pickup. These locations have limited to no interline service and our network moves the freight to the furthest point possible.
